

# Anameka Mail Boxes!

## How do we offer Anameka via post?

We can safely send Anameka from May through to the end of August. We cannot offer postage of Anameka outside of this period. We give your Anameka a bath in SeaSol prior to packing tightly into lined boxes and send via Australia Post with tracking details. Plants are safe in their boxes for up to 14 days, with most packages arriving within 4-5 days. Your Anameka should be planted as soon as you receive them to get the best results. Postage is at customers cost. Anameka plants are \$1.20 each PLUS GST, and for orders of over 10,000 plants they are \$1.00 each PLUS GST. Unfortunately we cannot send to TAS or WA. There are also requirements to send to SA customers meaning we need plenty of notice prior to sending to obtain Plant Health Certificates.

## Small Boxes - 90 Plants (approx)

We fit approx. 90 Anameka plants into a small mailing box. Small mailing boxes usually cost between \$15 & \$28 to send depending on weight at time of packing and recipients' location. This is a guide only as price can vary.

## Large Boxes - 250 Plants (approx)

Larger mailing boxes hold approx. 250 Anameka plants and usually cost between \$40 & \$65 to send depending on weight at time of packing and recipients location. Again this is a guide only as price can vary.

## Larger Orders - Freight Options

We offer boxing and freight of larger orders. Freight is recommended for orders of over 1000 Anameka. We pack your Anameka plants into wax boxes, and work with customers closely to ensure the timing of freight works, and we also work in with available freight networks. There is a \$10 boxing & handling fee for each box we supply. Freight isn't available everywhere, but we are always happy to investigate and work with customers as best as we can. We need plenty of notice to send larger volumes via freight as packing orders takes time.
